The Science Fair Surprise

Sophie loved science. When her teacher announced a school science fair, she got very excited. Sophie decided to build a small volcano that could erupt using baking soda and vinegar.

She worked hard for days. Her parents helped her paint the volcano with red and brown colours to make it look real. On the day of the fair, Sophie carried her volcano carefully to school.

Many students had made wonderful projects—solar systems, robots, and water filters. Sophie waited nervously for the judges to come by. When it was her turn, Sophie poured vinegar into the volcano. It bubbled and fizzed, and red foam spilled out.

Everyone clapped and cheered. Later that afternoon, the winners were announced. Sophie won first prize! She was surprised and happy. Her hard work had paid off. From that day, she dreamed of becoming a real scientist.

Multiple Choice Questions

1.What did Sophie love?

a) Art

b) Science

c) Music

2.What was announced at Sophie's school?

a) A picnic

b) A spelling bee

c) A science fair

3.What did Sophie decide to build?

a) A robot

b) A volcano

c) A car model

4.What materials did Sophie use for the eruption?

a) Water and oil

b) Lemon and salt

c) Baking soda and vinegar

Multiple Choice Questions

5.Who helped Sophie paint the volcano?

a) Her friends

b) Her teacher

c) Her parents

6.How did the volcano look?

a) Colourful and bright

b) Like a mountain with red and brown paint

c) Like a robot

7.How did Sophie feel before the judges came?

a) Angry

b) Sleepy

c) Nervous

8.What happened when Sophie poured the vinegar?

a) Nothing

b) It exploded loudly

c) It fizzed and foamed
